Nadir Ahmed

About Me

Since that day I have discovered programming during my undergraduate studies, I have written codes in JavaScript, PHP & Python. Becoming a backend developer is now a hobby for me and I have continued with that journey onwards.

I would like to expand and explore more as a developer. Having also completed my dissertation based on full stack development with the use of PHP and MySQL, as well as achieving a first class grade, made me even more passionate about becoming a backend developer. Currently in an IT Support Job but very eager to switch over to backend developer.

EXPERIENCE

AMA UK, London — *IT Support*

September 2022 - PRESENT

- Providing technical support for various departments where I manage IT providers as part of their 1st line support team.
- Responsible for answering and responding to phone calls and email, sorting out technical IT issues and ensuring that all issues are solved.
- Performed hardware and software installations, including configuring and releasing software updates.
- Responding to emails and calls dealing with technical issues and helping them solve it.
- Working under pressure and still managing to finish tasks on time.
- Writing reports on completion of a task and sending it to the manager on time as expected.

Gorillas LTD, London — *Rider*

January 2022 - September 2022

- Planning and directing routes to ensure the safe and secure delivery of customer orders.
- Ensure to deliver customer's orders within 10 minutes.
- Assisting team members inside the warehouse with stocking up shelves.
